Our modern paint shop recovers 99% of the paint. By reducing waste, we protect the environment.

Colors at no extra charge

- C35 (standard finish, no index notation required).
- Colors from the Instal Projekt palette marked with * are available at no extra charge.

Color surcharges

Other colors from the Instal Projekt palette: +15%
RAL palette: +25% (applies to colors not available in the Instal Projekt palette).

Remember

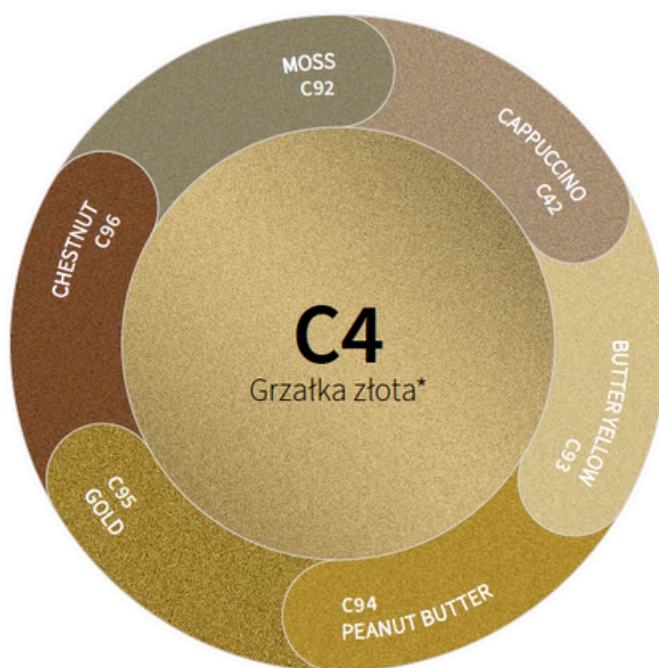

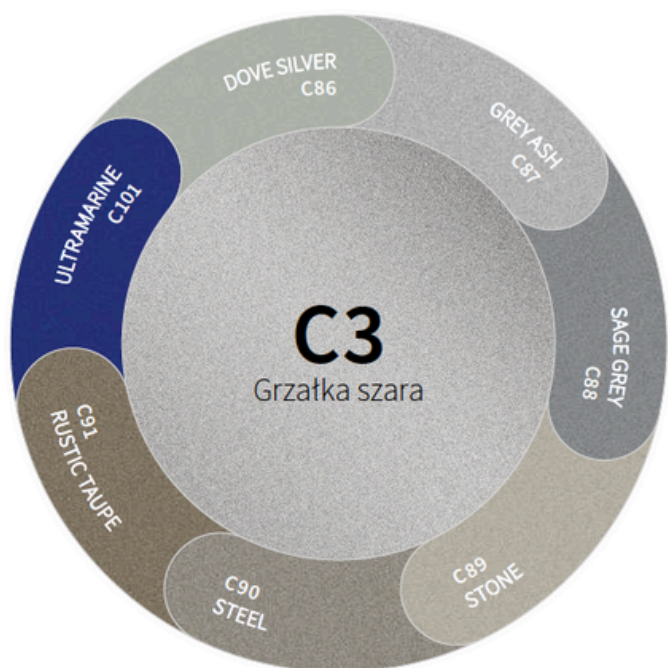

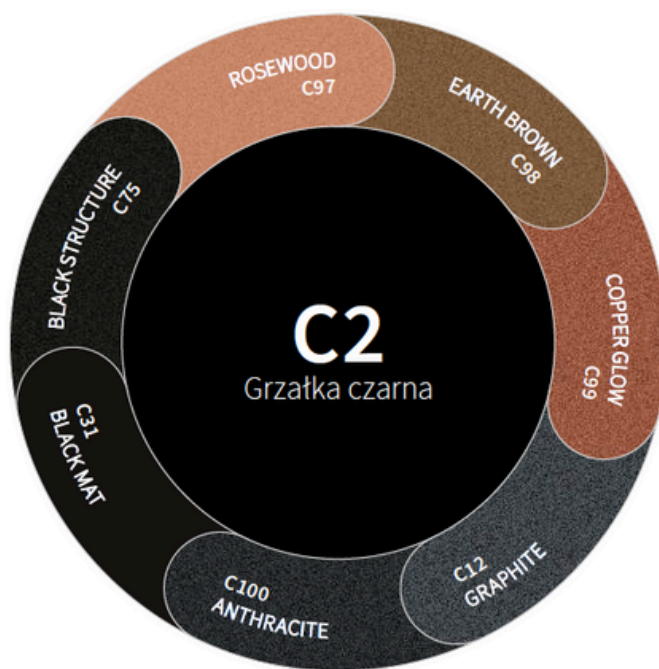

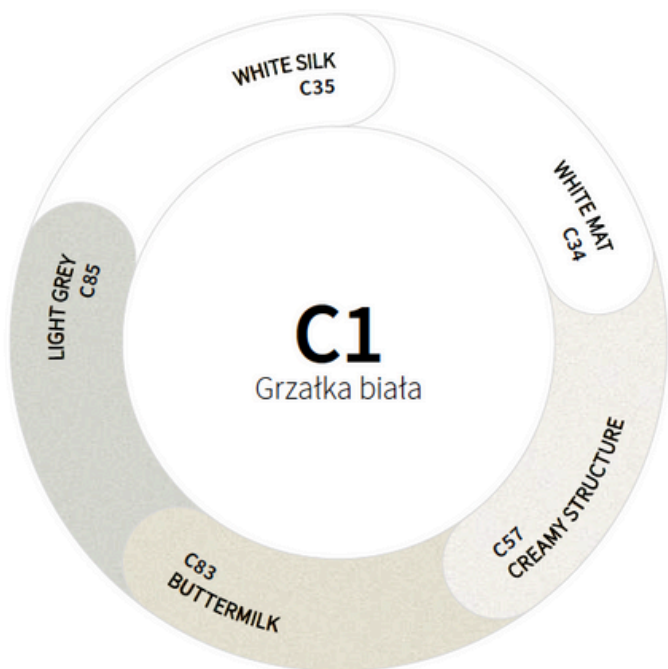

Printed colors are for reference only. The radiator's color may differ significantly from the presented sample.

Sources of the coating's reliability

- We protect the surface with at least two layers of external coating.
- We provide triple corrosion protection for the product by using zirconium passivation nanotechnology.

Suggested combinations of colors from the IP palette with electric heater colors

- All products are alkali-degreased and rinsed with DEMI water, significantly improving the quality of the coating.
- We take no risks. We use paints exclusively from trusted and leading manufacturers worldwide.

* Note: The HOT² electric heater is the only model available in gold color.

EDITION No. 01.2025.
